Woodville
200 x 1200 mm
It all started with a belief, and a purpose - a belief that there's no such feat which cannot be achieved, and a purpose to deliver the world's best products and services. 6 decades later, we're one of the largest, and the only premium tile brand in India. And we're only getting started.

NITCO is the only company in the country to boast a state-of-the-art, fully-integrated, automated plant, with benchmark processing systems and the most advanced technology. We are also the only company with an automated sorting process. This ensures quality consistency with the least variations. Our plant houses the country’s most advanced Lab, with skilled technicians, professionals and experts from across the globe, ensuring quality and standards par excellence.

But most importantly, our processes, systems and technology also offer one more extended feature—peace of mind. In an industry where minor defects and imperfections are a norm, we strive to offer quite the opposite. With NITCO you are assured minimum risk, and the best quality, at all times. A definitive proof of that comes in the goodwill we’ve created amidst the Architect and Dealer fraternity across India.

**Woodville Collection**

**Laying Pattern of Tiles**

**Design Ideas**

---

1. Mark and lay out the tiles from the center of the area to be tiled so that cut tiles, if any, will be on the outer edges towards the wall.

2. Maintain a gap of 1 mm to 2 mm between every two tiles to allow for possible expansion as per BIS/EN tolerance norms. For the same usage of a SPACER IS COMPULSORY.

3. Don’t do a full offset with wood plank tile. By doing a 50% offset, where the middle of a tile is exactly in line with the grout joint of the next row, you have maximized the amount of unevenness, or lip page, between the tiles. The American National Standards Specifications for the Installation of tile sets the limit at 33% maximum offset (ANSI A108.02 Section 4.3.8). This means that on a 24 inch long tile the maximum offset is 8?

4. For tiles in wood planks format, kindly following similar patterns as given in Fig. 1 and Fig. 2.

5. Complete the tile laying process by pressing the tiles firmly into place along the floor.

6. Ensure 3-4 days for bed curing. After this period fill the joints with grout.

7. Fifteen minutes after finishing the grouting process wipe off excess grout with a damp sponge and polish the tiles with a soft and dry cloth for a clean surface. The tiles can also be cleaned by mild acid (However Hydrofluoric acid and its derivatives should not be used).

8. Kindly look for the arrow / alphabet on the back of the tile and follow the laying pattern as specified.

9. Under no circumstances Company shall be LIABLE in case any problem arises out of non-adherence of the above tile fixing / laying instructions.

10. Your beautiful NITCO flooring is now ready with the elegant look.

Nothing in these instructions is a substitute for good workmanship and supervision.

The reproduction of tiles in this catalogue is restricted to four colour printing only and tiles are not relative in sizes. Conforming to ISO requirements, technical specifications of NITICO tiles are applicable only for first grade / first quality tiles. Please inspect all tiles prior to installation. Company will not entertain complaints once tiles are laid / fixed. Price category & PEI grade may change without any notice. Customers are advised to confirm it before placing order.
